

Zynex Pro Wrist Brace

Hand and Wrist Orthosis

Zynex Pro Wrist Brace

The Zynex Pro Wrist is a multipurpose upper extremity orthosis that provides hand and wrist support.

The Zynex Pro Wrist is a progressive pain management solution for pre-, post-, and non-operative hand and wrist issues, including carpal tunnel syndrome.

Key Features

- Universal sizing
- Provides support and stabilization
- Can be set in flexion, extension, or full ROM
- Immobilizes and restricts hand/wrist movement
- Ambidextrous design maximizes patient comfort and wearability
- Range of motion dial provides patient specific neutral immobilization, eliminating pressure on the median nerve

Indications for Use

- Carpal tunnel syndrome
- Tendonitis
- Wrist immobilization
- Distal radius fracture
- Mild to moderate sprains and strains
- Post cast healing
- Rheumatoid arthritis

Maximum Comfort

Dual quick-lace compression design and moisture-wicking neoprene sleeve maximize patient compliance.

Precision ROM Dial

Allows providers ultimate control in setting flexion or extension to optimize patient recovery and reduce median nerve pressure.

Two Conservative Treatments

Combining carpal tunnel-specific wrist bracing with electrotherapy can be part of a supportive approach to wrist care and rehabilitation. The brace provides targeted support, while electrotherapy delivers gentle stimulation. This combined treatment supports ongoing wrist comfort and function for carpal tunnel syndrome.
